

9m/13m Conveyor

Our electric, modular Conveyor is a lightweight, compact solution that enables efficient transfer of materials.

Applications:

- On construction sites for moving materials such as concrete, bricks and mortar
- can be used to convey material up/down a slope

Features:

- Single-phase electric drive system is removable and easy to install once conveyor is in place
- Lightweight for easy handling and on-site installation
- Troughing idlers with vibrating return idlers keep the conveyor belt clean
- Modular design allows 9m or 13m configuration
- Easy to transport and install on-site
- 30m neoprene electric cable
- Manufactured in South Africa with all spare parts locally available
